The exhibit will be situated just opposite the main entrance on Van Ness avenue, and will consist of a replica of Yellowstone park and a reproduction of the famous Old Faithful inn of the park. The inn will consist principally of a cafe and banquet halls, and the miniature park will occupy about an acre of ground showing the mountains, geysers and other natural features.

## A Wonderful Fuel

In this age of exacting standards, merit alone deciding factor.

The truth of this is vividly exemplified in the Aberdeen Coal.

1906 marked the opening of this famous vein. periority was demonstrated and sales commenced rush. They've grown tremendously every year.

Last year's output Aberdeen mine was that of any other opening in Utah.

No other western compares with "Aberdeen" in actual fuel content other western coal as a heat producer.

It's a wonderful fuel. Buy a ton. Submit to the most severe test burning. You'll find, as thousands of others have, it is the most satisfactory coal on the market.

can think of. Compare it with the other coals you're burning. You'll find, as thousands of others have, it is the most satisfactory coal on the market.
